### **Election/Restriction**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-65 and 143-198, drawn to an article comprising a high crystalline layer and a low crystalline layer wherein the high crystalline layer has a melting point at least 25C greater than the low crystalline layer.

Group II, claim(s) 66-69, drawn to an article wherein the crystalline layers are compatible.

Group III, claim(s) 70-103, drawn to process of making an article comprising a high crystalline layer and a low crystalline layer wherein the high crystalline layer.

Group IV, claim(s) 104-135, 137, 139, and 141, drawn to process of making an article wherein the product is elongated.

Group V, claim(s) 136, 138, 140, and 142, drawn to an elongated product.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The expression special technical features is defined as meaning those technical features that define the contribution which each claimed invention, considered as a whole, makes over the prior art. In the present invention, the features every claim has in common is to an article comprising a high crystalline layer and a low crystalline layer. Said features fail to define a special technical feature because they fail to make a contribution over the prior art. Specifically, US 6,423,420 teaches an oriented multilayer article comprising an

ethylene copolymer layer and a polypropylene layer. Herein, the ethylene copolymer layer is understood to read on the low crystalline layer and the isotactic polypropylene is understood to read on the high crystalline layer.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product

are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
